

# Daniil Sivak, Programmer

✉ [seroperson@gmail.com](mailto:seroperson@gmail.com)    [seroperson](#)    [seroperson](#)    [seroperson.me](#)

## Personal summary

Generally, just the man who loves jvm-related things, linux and black tea. But besides the programming and all these computer technologies, I also enjoy to write some stories in prose (which nobody has never seen at the moment), read books, discover myself and dream about the future.

Currently primarily involved in android (and a little bit of scala backend) development. My work experience includes the creating different mobile applications from scratch, participating in open-source projects and working within big teams.

## Education

- **Since 2014:** Bachelor of Mathematics. Faculty of Mathematics, Mechanics and Computer Sciences (MMCS), South Federal University (Rostov-on-Don, Russia)
- **2003-2014:** Secondary education (Kerch, Ukraine)

## Skills

- **Android:** material design, dagger, rx, retrofit, kotlin, android.support.\*
- **Scala:** standard library, sbt
- **Software:** git, vim, zsh, idea, docker, linux, osx
- **Languages:** russian (native), english (proficient)

## Employment

- **Since 2015:** Android Developer at [tochkak.ru](#)
  - Developing application that helps user to monitor the state of cinema's equipment.
  - Creating from scratch the customizable project to build applications for selling tickets in a certain cinema or in a group of cinemas. Participating in it's backend.
